

Slide Units for Cylinders DIN ISO 6431 and VDMA 24 562

Bores from 32 to 100 mm

Standard executions		
Version	Symbol	Type
U-shaped (light) with sintered bronze bushings		UGLB
H-shaped (heavy) with sintered bronze bushings		UGPB
H-shaped (heavy) with spherical bearings		UGPS

On request, they can be supplied according Directive 94/9/EC - **ATEX**
CE **II 2 G Dc T5**

Series of linear slide units for cylinders DIN ISO 6431 and VDMA 24 562 with 4 possible fixing surfaces. They must be used with heavy loads to guarantee a better linearity of movement and a higher precision. They can sometimes be used as anti-rotating devices too. The versions with spherical bearings slide better but can support lighter loads than the version with bronze bushings. The U-shaped versions, can support lighter loads than the H-shaped ones.

Options	Suffix
Rods in stainless steel AISI 316	K
Special versions on request	/ S

For loads see pages 1.70.25 - 1.70.30.
 For mounting accessories see from page 1.70.40.

The options can be combined (when this is possible)

How to order: UGPS40/200K

UGPS	40	/	200	K
Type	Cylinder bore	/	Cylinder stroke	Option

Technical data	
Temperature range	-20 °C ÷ + 70°C
Materials	Body: Anodised aluminium Plate: Anodised aluminium Seals: Polyurethane Bushings: UGLB-UGPB: Sintered bronze UGPS: Spherical bearings Rods: UGLB-UGPB: Chrome plated steel C45 UGPS: Hardened and chrome plated steel CF51
